project-1

CiBot
Uh oh! Build <id> failed on branch <branch> due to the following reasons:
• <reason 1>
• <reason 2>
• <...>
Should I create an issue called and assign it to <@dev 1>?
(<@ dev 1> was the last person to push to this branch).

| YES | YES, BUT CHANGE ASSIGNEE | NO |

OK. What would you like to call this issue?

Sourabh
Call it <title>.

CiBot
Will do. The <title> issue has been created and assigned to <@dev 1>.
