CiBot

Igibek
init travis igibek/project-1

CiBot
Done! Travis CI has been activated on the project-1 repo.
Would you like to configure the .travis.yml configuration file?

YES　**NO**

OK! I'll create the .travis.yml file. Which language will you be using?

JAVASCRIPT　**RUBY**　**...**

Is there anything else you'd like me to set up?

Igibek
Yes, can I add Coveralls to this project?

CiBot
Can do! I've activated Coveralls on the project-1 repo.
Is there anything else you'd like me to set up?

Igibek
Nope, I'm done.

CiBot
OK — you can now manage this project from the new project-1 channel.
Happy coding!
